

**HEALTH AND SAFETY ACT 1974
CONTROL OF SUBSTANCES HAZARDOUS TO HEALTH REGULATIONS 2004**

PIPE INSULATION PRODUCTS

Under the above act we as suppliers of Climaflex, Tubolit, and CityLag foamed polyethylene Insulation product's, are required to advise all our Customers of the safe handling precautions necessary when using our products.

There are no CFC's used in the production of Climaflex, Tubolit and CityLag foamed polyethylene tubes.

All products should be stored in a safe manner so as to avoid ignition.

Polyethylene products will burn if ignited by exposure to a naked flame; therefore care in storing is advised.

Climaflex, Tubolit and CityLag can be handled safely but should only be used for the purpose which they are intended and within the parameters of the specifications and in accordance with the recommendations of our instructions and technical literature.

For further information contact our helpline on 01531 630068
