

Universal Twin Pumps

Universal Twin pumps are designed for installation into vented systems to pump both the hot and cold water supplies - boosting both equally. Suitable for both positive and negative head applications.

Universal pumps do not require a gravity flow of water to start.

Features

- Robust brass construction
- 1.5 - 4.5 bar performance options
- Continuously rated
- EPDM/PTFE/Al. Oxide seal
- G $\frac{3}{4}$ threaded connections
- Pre-wired with 1.5 metre power cable
- Anti-vibration feet
- 5 year guarantee (subject to conditions)
- **UK Specification:** Supplied with 22 mm push-in x 300 mm anti-vibration flexible hoses with integral isolating valves
- **ROI Specification:** Supplied with 21 mm push-in x 300 mm anti-vibration flexible hoses with integral isolating valves
- **Export Specification:** Supplied with G $\frac{3}{4}$ female x 300 mm long hoses

Application

- Boost hot and cold water services to the complete home, bathroom, kitchen or cloakroom.
- Pressurise the supply in applications such as loft conversions, where outlets are higher than the water source.

* The maximum pressure that can be applied to the pump under any installation conditions.

** A stored water temperature of 60 °C is considered sufficient to meet all normal requirements and will minimise deposition of scale in hard water areas.

*** Both heads pumping 4.5 l/min and above.
