Underfloor Heating

Edge Strip

Used as an expansion gap around the edge of the floor for underfloor heating

Overview

JG Underfloor Edge Strip is used around the edge of a solid (screed) floor to provide an expansion gap as the floor heats up and cools down. It also has insulating properties ensuring heat loss is kept to a minimum.

Features & benefits

- Foam edge strip for screed floors
- Acts as an expansion gap when the floor heats up and cools down
