Outer Rain
& Inner Jet

Inner Mist

Contents

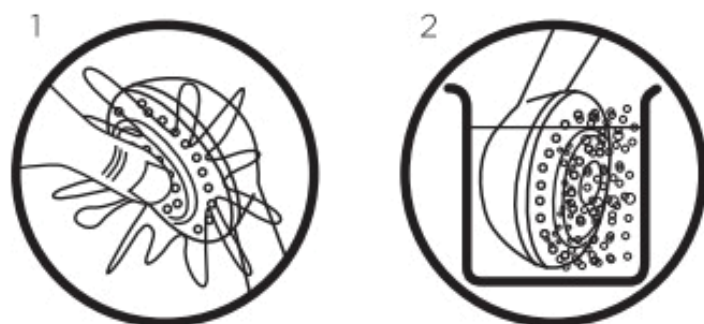

- 1 x 5 mode Chrome shower head
- 1 x Chrome riser rail
- 1 x 1.5m Stainless steel hose

Riser rail fitting instructions

1. Establish height of riser rail to suit user's requirements.
2. Remove caps from the brackets.
3. Mark the wall where the lower bracket is to be fixed ensuring there are no pipes or cables.
4. Drill and plug the wall and fit the lower bracket.
5. Fit the rail through the lower bracket. Place the remaining bracket on top of the rail making sure the plastic shield is at the back and the holes are aligned. If replacement riser, fix and screw into existing hole. If new installation, ensure the screw hole position is vertically aligned using a spirit level and mark the wall. Remove the rail from the lower bracket then check for pipes or cables before drilling and then plug the wall. Insert the rail into the lower bracket and upper bracket like before and screw into the wall.
6. Refit caps.
7. Adjust the height of the shower head and soap tray by sliding up and down as desired.

Cleaning instructions

This showerhead should be cleaned periodically to remove limescale or debris, which may reduce the performance of the shower. The frequency of cleaning will vary according to the local water quality.

Images for illustration purposes only

1. To break away scale on a daily basis, rub your thumb over the surface whilst the shower is running.
2. If scale deposits are stubborn, soak the showerhead in a proprietary limescale remover and rinse thoroughly before use.

Warning

Do not use the showerhead if blocked or damaged. Avoid the risk of scalding always check the water temperature before using the shower.
