

1.5m STAINLESS STEEL DOUBLE INTERLOCK SHOWER HOSE

This shower hose performs to the very highest levels of strength, durability and hygiene.

Manufactured and tested to the requirements of BS EN 1113.

The strong outer casing encloses an inner liner which cannot twist and cause restriction to the water flow, and also resists bacteria build up.

Instructions for care

Clean regularly with a non-abrasive household cleaner.

Warning

This product is designed for use with temperatures up to a maximum of 60°C. Water temperatures above this are considered dangerous for use in showers.
